

# Arya Baride

I'm a highly motivated individual looking for ways to learn and dive deeper into Cloud technologies. While I try to excel in the field of cloud computing, I'd like to join an organization where I can contribute and learn more about Cloud/Infrastructure.

## EXPERIENCE

### **PearlThoughts — Devops Trainee**

June, 2024 - July, 2024

During this internship, I worked on real-world projects tasks using Terraform, Docker, AWS, Strapi and Github Workflows. This hands-on experience has not only broadened my technical skills but also deepened my understanding of modern devops practices.

## EDUCATION

### **Government Polytechnic, Pune— Diploma in Information Technology**

July 2019 - July 2022.

Score - 90.8%

### **PES's Modern College of Engineering, Pune— BE. (Information Technology)**

November 2022 - July 2025

Score - 9.1 CGPA

## PROJECTS

Deployment and containerisation of an application using Docker. [Github Link](#)

Automated deployment of an application on EC2 using Github Actions [Github Link](#)

Deployment of a static website using S3 and AWS Amplify. [Hashnode Link](#)

## SKILLS

Languages: Python, Bash

Frameworks: Django, Flask

Tools: AWS, Docker,

Nginx, Strapi, Terraform,  
MongoDB, Git and Jenkins

## VOLUNTEERING

### **Modern College of Engineering's Pixinsight - Vice President**

As a Vice President, I am responsible for Marketing, Organising and Conducting various art related contests and workshops online and offline at college level.

## CERTIFICATIONS

### **IIT Bombay - Implementation of Data Structures - November 2021**

### **Amazon Web Services - Certified Cloud Practitioner - July 2025**

Deployment of an application in EC2 using a free API. [Hashnode Link](#)

Deploying a scalable VPC architecture with Load Balancers ,  
Auto Scaling groups, NAT Gateways and Elastic IPs. [Hashnode Link](#)

Built a serverless API using AWS Lambda, Dynamodb, API Gateway and  
CloudWatch. [Hashnode Link](#)

A shell script that lists all the resources running in your AWS account. [Github Link](#)

A shell script that maintains and automates your backups. [Github Link](#)
